

## WHAT OTHERS SAY ABOUT SOFTFIT™ TECHNOLOGY

Given the choice, more patients choose SoftFit™ technology than any of the alternatives. We asked 55 patients and this is what they said about compression garments made with SoftFit™ technology when compared to their experiences with comparable alternatives:

“The top of my arm sleeve feels much less restrictive.”

“They don't cut into my skin.”

“They feel more comfortable to wear.”

“This new garment doesn't show under my pullover, and it doesn't slip down.”

## WE ARE THE COMPRESSION GARMENT EXPERTS

At JOBST®, we are constantly developing new technologies and advanced solutions to ensure we have a complete range of highly effective therapy solutions for all stages of lymphedema and venous insufficiency.

**New SoftFit™ Technology -  
Advanced Lymphedema Solution**

## MANAGING YOUR LYMPHEDEMA JUST GOT EASIER

If you need to wear compression garments as part of your Complex Decongestive Therapy to manage lymphedema, you need to know about SoftFit™ technology. It's a unique system of silicone yarns, knitted into the welt of some of our compression garments. It provides more gentle, seamless friction on the skin which means there's no cutting in and less slipping down, even when moving about.

## IMPROVE YOUR QUALITY OF LIFE

Compression garments that look good and feel comfortable are so much more likely to be worn even during the early stages of lymphedema treatment. With less bulkiness and greater comfort you'll be amazed at how smooth and easy it is to wear SoftFit™ technology.

## THE RIGHT COMPRESSION GARMENT EVERY TIME

SoftFit™ technology complements our knitted welt and silicone band compression garments and works across all stages of lymphedema treatment.

There are many factors and criteria to consider, including both physiological and psychological, before deciding on the best choice of garment. For that reason it's wise to discuss your options with your doctor.
