

## Tip on storing & handling TENA products to minimize the risk of spreading infection

- 1**  Remove transport box from inner packaging and place on shelves, the floor is never recommended as a storage area
- 2**  To facilitate order in storage room, do not open more than one package at a time
- 3**  Incontinence products that are in open packaging are only for intended residents and must be discarded when resident is moving or changing prescriptions
- 4**  Unopened packaging can be reused when wiped with disinfectant before being moved out of the resident's room
- 5**  Make sure to not touch the inside of the incontinence product to keep it clean until it is fitted on the body
