MADE IN CANADA

At Essity, we believe that better hygiene and health are necessities of better lives.

Our mission is to sustainably develop, produce and market innovative, high-quality products and solutions.

With a facility located in Drummondville, Essity strives to contribute to improving the quality of life of Canadians by manufacturing personal care and incontinence products locally.

A STRONG FUTURE IN DRUMMONDVILLE

Essity is a global hygiene and health company that strives to make the lives of Quebecers better by manufacturing personal care and incontinence products locally.

We are proud to support Canada and the Quebec market with our investment in Drummondville.

QUALITY CARE AND PRODUCTS

For us, it is essential to provide safe, high-performing, and quality products to our customers.

As a responsible business partner, we hold our products to high standards of quality, innovation and safety while striving to meet environmental requirements.

Quality, innovation and safety

Quality products increase customer dignity, help reduce overconsumption, and reduce treatment costs and labour time.

Fostering sustainable development

Essity is placing greater emphasis on energy efficiency, the elimination of fossil fuels and the increased use of renewable energies.

HIGH PERFORMANCE MANUFACTURER

Essity Drummondville is a high-performance manufacturer that continually strives to meet and exceed the needs and requirements of our customers through continuous improvement, prevention, and compliance.

Our Drummondville facility is ISO14001 certified in environmental management.

ISO Quality Management9001

issued by Health Canada for the manufacture, importation & distribution of Class I medical devices

SUSTAINABILITY INITIATIVES

Our Drummondville facility has not sent any production/process waste to landfills since 2013.

In 2020, Essity introduced an organic waste collection program in partnership with a composting company.

Per year,
Drummondville
recycles:

40 tons
of metal

1115 tons
of
product trims

300 tons
of
corrugated cardboards

865 tons
of
production waste

(briefs with defects, uncomplete briefs, etc)

235 tons
of
packaging plastics

2.5 tons of
organic waste
