

TENA SMARTCARE CHANGE INDICATOR™

MAKE THE RIGHT CHANGE

TENA SmartCare Change Indicator™ is a digital health solution that supports caregivers by letting them know when to consider changing absorbent products. But that's just the start. Being able to change products at the right time not only improves wellbeing for those in care. It also relieves pressure on caregivers, reduces product consumption and cuts waste. It's time to make the right change.

Use better. Use less. tena.com

A NEW WAY OF WORKING AND A SMARTER WAY TO CARE

The elderly population is growing and older people are living for longer. Many of them, however, are living with different health conditions and there are simply not enough caregivers to look after them. Hiring more caregivers is not an option. Instead, care facilities must change to a new way of working, where digital health solutions are used to support caregivers and help them carry out tasks – freeing up valuable time and resources while reducing stress and strain.

TENA SmartCare Change Indicator™ is a digital health solution that supports caregivers by notifying them when absorbent products are dry, slightly wet or if it's time to consider change. This means more absorbent products can be changed at the right time – not too early, not too late and with no guesswork. With TENA SmartCare Change Indicator™, you can make a change that benefits everyone.

The benefits of TENA SmartCare Change Indicator™

USE BETTER, USE LESS

At TENA, we always prioritise quality, so our products, digital solutions and services can deliver the greatest value. So residents can benefit from better skin health and a better quality of life. Caregivers can benefit from better support and a more rewarding working day. And care facilities can benefit from a better use of budget and resources with lower product consumption and less waste for more sustainable continence care.

When you choose TENA SmartCare Change Indicator, everyone benefits.
Because when you use better, you use less.

Better for residents

- 68% reduced leakages*
- Better skin health and avoid IAD
- Fewer daytime interruptions and 25% fewer interruptions at night**
- More comfort and dignity
- Less time in saturated products
- Total absorbency reduced by 35%**

Better for caregivers

- 30% reduction in time spent on continence care**
- 68% reduced product checks*
- 35% reduced product changes**
- Less laundry – clothing and bedding
- Increased job satisfaction

Better for care facilities

- Reduce product costs by €58 per person, per year*
- Reduce labour costs by €2933 per person, per year*
- Reduce laundry costs by €800 per person, per year*
- 30% reduction in time spent on continence care**
- Less waste

HOW THE TENA SMARTCARE CHANGE INDICATOR™ WORKS

The TENA SmartCare Change Indicator is applied to the outside of the absorbent product. It is reusable, easy to clean and consists of an integrated sensor strip and transmitter. The sensor strip and transmitter are lightweight and discreet so as not to disturb the resident.

It can be used with all TENA ProSkin absorbent hygiene products. This means residents can continue using the protection they are already comfortable with, and which assessments show best suits their individual needs.

Tracks the product's saturation level

The sensor strip tracks the saturation level inside the product. Sensor strips come in one size, are easy to clean and last for up to three months.

Collects information about saturation levels

The transmitter collects information about saturation levels in real time and forwards it to caregivers' smartphones. It is reusable, easy to clean and can be used on multiple residents.

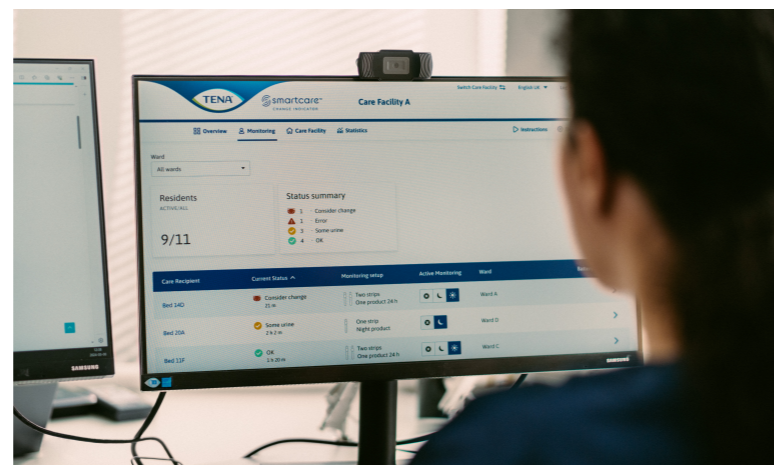

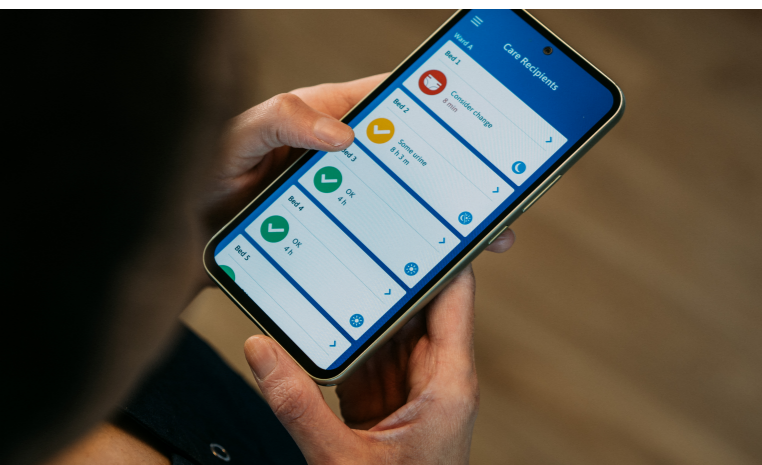

Notifies caregivers when to consider change

Change notifications let caregivers know if a product is dry, slightly wet or if it is time to consider change. This ensures products are changed at the right time and removes the need for frequent manual checks.

Information to adapt and improve care

All information is saved securely in the dashboard. The information is presented as easy-to-read reports that can be used to improve and adapt care as residents' needs change.

How TENA supports you every step of the way

1. Training & set-up

We help set up the TENA SmartCare Change Indicator incl. gateway, app, dashboard. We also provide training.

2. Support during use

Once the TENA SmartCare Change Indicator is up and running, we provide support and guidance during use.

3. Follow-up

We help review dashboard reports so you can continually adapt the level of care as residents' needs change.

ARE YOU READY TO MAKE THE RIGHT CHANGE?

To meet current and future care challenges, we all have to think differently. We have to adapt to an ever-changing world and embrace new ways of thinking and working.

When it comes to continence care, we know that you can never replace the human touch. But we believe that by choosing digital health solutions to support caregivers and help them carry out their daily tasks, care facilities can provide an even higher standard of care.

With our range of TENA SmartCare™ digital health solutions, we can provide welcome support for caregivers who are often overworked, under pressure and understaffed. We can also ensure that those living

with incontinence benefit from truly person-centred care, where human expertise, empathy and understanding are complemented by a unique level of digital insight and accuracy.

It's time for a new way of thinking, it's time for change.

This is TENA SmartCare

TENA SmartCare Identifi™

Designed to support caregivers by helping them carry out accurate continence assessments. The results are then used to create person-centred care plans.

TENA SmartCare Change Indicator™

Designed to support caregivers by notifying them whether absorbent products are dry, slightly wet or if it's time to consider change. TENA SmartCare Change Indicator™ can be used with all TENA absorbent products.

TENA™
PROTECTS
PROGRAM

WORKING TOGETHER TOWARDS MORE SUSTAINABLE CONTINENCE CARE

With TENA absorbent products and TENA SmartCare™ solutions, we can help nursing homes work in a more sustainable way by reducing product consumption, energy use, workloads and waste. But we know that we can always do more. That's why we created our TENA Protects Program.

The TENA Protects Program is about protecting people and improving their wellbeing while reducing our climate impact. Since 2008, we have continuously reduced the carbon footprint of our absorbent products throughout the entire product lifecycle.

TENA can help you deliver better, more sustainable continence care. Let's talk!
