JOBST® INNOVATIONS

Essity Canada Inc. connects its broad portfolio in Wound / Vascular Management, Lymphology and non-invasive Orthopedics with strong technological competencies to meet the market's need for reduced complexity and more efficient treatments. With a continuously developing unique and holistic network of integrated therapy solutions, Essity consistently supports a continuum of care.

JOBST® SOFTFIT™ - TRUE GRADIENT COMPRESSION

Garments that have the unique JOBST SoftFit technology have a fine silicone yarn knitted into the top band that keeps the stockings in place without digging into the patient's skin. So your patients can be **empowered to confidently and comfortably jump into the joy of life** without worrying that the garments are sliding down.

3D Knitting

3D KNITTING - LIKE A SECOND SKIN

The 3D knitting technology reproduces each body shape accurately and has revolutionized the market with compression garments of uncompromising quality and an anatomical fit that feels **like a second skin**.

JOBST® SENSITIVE - MORE COMFORTABLE SILICONE BAND

JOBST® has enhanced its high quality thigh high garments with a **more comfortable silicone** band with yarns that are woven into the welt fabric, not coated onto the material. This allows for even distribution of friction, soft grip on the skin, less trapped moisture which leads to a reduced risk for red marks and irritated skin.

DRI-RELEASE® - DRY, COOL AND COMFORTABLE FEET

Moisture management to help keep feet **dry, cool and comfortable**.

CONTOUR FIT

Unlike traditional flat-knit technology, Contour Fit works by adapting the fit of the garment at four positions on the limb (instead of one) to create a garment that truly contours the unique form of an individual's body.

COMPRESSION LEVEL

Farrow 4000 is excellent for day and night compression in the treatment of vascular problems as well as venous leg ulcers.

We do not recommend Farrow 4000 for the treatment of lymphedema because the bands do not overlap by 50%, which is an important safety factor.

Step 1: Determine the band size:

- Measure circumferentially below the bust where a regular bra sits.
- Drop the tape 5 cm - 7.5 cm and measure around the bottom of the rib cage.
- Use the larger of the two rib cage measurements as the band size. Round odd numbers up.

CUSTOM TERMS AND CONDITIONS

USE OF PATIENT MEASUREMENTS

If a patient changes his/her medical supply provider and requires a new custom-made compression garment, they are allowed to request a release of their measurements for use at a different facility if necessary. If the patient has current measurements prior to changing facilities, Essity Canada Inc. will process the order at the discretion of the new fitter. Any custom-made garment ordered, using the measurements of a prior fitter, cannot be guaranteed for fit. If this compression garment does not fit, the new fitter must re-measure and order a new garment for his/her patient. It is the suggestion of Essity Canada Inc. that all patients be re-measured subsequent to changing medical supply providers.
